HUNTING AND HARVEST REPORT

PREFACE

1995 MOOSE, SHEEP, AND GOAT HUNTING AND HARVEST REPORTS

Survey Approach

An attempt was made to contact all resident and nonresident moose, sheep, and goat license holders in our license database. Hunting and harvest data were acquired via telephone for license holders with valid telephone numbers and via a mail survey for those license holders we were unable to reach by telephone.

Definitions

HUNTERS	The number of hunters who hunted one or more days
HUNTER DAYS	Sum of whole days or portions of days hunted
PERCENT SUCCESS	The number of successful hunters divided by the total number of hunters and multiplied by 100 (see explanations below)
LOWER	Lower confidence limit at a level of confidence of 80 percent
POINT	The estimated value
UPPER	Upper confidence limit at a level of confidence of 80 percent
SP	An abbreviation for special license
SPECIAL	Used in regional or state summary pages to indicate total of all special licenses
YOUNG	Young-of-the-year age category
ADL F	Adult females
ADL M	Adult males
UNKWN	A symbol for unknown used to designate unknown sex
TOTAL HARVEST	Estimated total kill for all age/sex classes
NO DATA	No questionnaire response data, often because no licenses were sold.

Explanations

The moose, sheep, and goat hunting and harvest statistics are estimates made from a sample of 724 moose, 492 sheep, and 275 goat questionnaires representing about 94% of moose, 91% of sheep, and 94% of goat licenses issued. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

All estimates represented are rounded to the nearest whole number. It is for this reason that the sum of column values does not always agree exactly with column totals given, and percent success may not always agree with the rounded estimates for hunters and harvest.

(OVER)

PREFACE (CONTINUED)

Following is an example calculation of hunters, harvest, and percent success. Suppose there were six resident goat licenses issued for hunting district/option 518-00 and we were able to contact and complete questionnaires for five of the six license holders. If four of the five license holders contacted went hunting, and two of them killed a goat, then the calculations are as follows:

LICENSES ISSUED = 6
CONTACTED SAMPLE = 5
SAMPLE HUNTERS = 4
SAMPLE HARVEST = 2
EXPANSION FACTOR = LICENSES ISSUED / CONTACTED SAMPLE
= 6/5 = 1.2
ESTIMATED HUNTERS = EXPANSION FACTOR X SAMPLE HUNTERS
= 1.2 X 4 = 4.8
ESTIMATED HARVEST = EXPANSION FACTOR X SAMPLE HARVEST
= 1.2 X 2 = 2.4
PERCENT SUCCESS = (SAMPLE HARVEST / SAMPLE HUNTERS) X 100
= (2/4) X 100 = 50

In the above example, after rounding, the report would correctly indicate 5 hunters harvesting 2 goats with a success rate of 50%.

ADDENDUM

Bill Hoskins, the computer programmer/analyst for the annual Harvest Surveys analysis and reporting effort since 1985, tragically passed away on March 13, 1996. The 1995 Goat, Moose, and Sheep Hunting and Harvest and Time Period of Kill Reports were generated using Bill's routines and procedures to the maximum extent possible. At the time of Bill's death, the hunter sample had already been drawn, the responses had been recorded, and had mostly been keyed into computer files. The hunter regulation "parameter" files, which define the number of special permits issued by district and type, had also been entered into a computer database. The only exception was that the breakdown of permits issued to residents and nonresidents by district and type was not available. This information was obtained from 1995 Drawing Statistics tabulated by the Special Licensing Bureau in Helena.

Several quality control steps were taken to insure the validity of the Goat, Moose, and Sheep statistics. Survey response data were verified at entry. The license/permit parameters were checked against the final hunting regulations and drawing statistics. At each run of the analysis and reporting routines, diagnostic summaries were generated which indicated invalid response records and summarized the sampled percent of the license/permits issued by hunting district and type. Those showing oversampling were flagged. Inconsistencies and/or irregularities revealed by these diagnostic reports pointed to errors in either the response or parameter files. Errors in individual districts and types were corrected by checking the data files against the original response forms or parameter information. Once the diagnostic summaries revealed no errors, the reports were reviewed by research and management biologists before printing.

TIME PERIOD OF KILL

PREFACE

1995 MOOSE, SHEEP, AND GOAT TIME PERIOD OF KILL REPORTS

Survey Approach

An attempt was made to contact all resident and nonresident moose, sheep, and goat license holders in our license database. Hunting and harvest data were acquired via telephone for license holders with valid telephone numbers and via a mail survey for those license holders we were unable to reach by telephone.

Definitions

UNKWN...............	A symbol for unknown used to designate unknown time period of kill
SP..................	An abbreviation for special license preceeding the special license district/option designation
SPECIAL.............	Used in the regional or state summaries to designate combined special licenses

Explanations

The moose, sheep, and goat time period of kill statistics are from a sample of 724 moose, 492 sheep, and 275 goat questionnaires representing about 94% of moose, 91% of sheep, and 94% of goat licenses issued. No expansions or estimates are given. The percentages are from the actual sample data collected. Sample number killed in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the kill statistics in the hunting and harvest section of this report.
